NSG – Agreement for sale of power plants concluded

The Board of Norske Skog has today approved the sale of the thirteen hydro power plants which the company owns in Norway. Immediately following the Board-meeting, Buskerud Kraftproduksjon as buyer signed an agreement to purchase 10 of the Norske Skog's power plants located on the Drammen river system, on the Skien river system and in Flatanger in the county of Nord-Trøndelag. It is not yet decided who will buy Norske Skog's power plants on the Halden river system. These sales are subject to the approval of the authorities, and it is expected that this procedure will be completed during autumn 2002. The transactions will be closed and booked in Norske Skog's accounts as per 01.01.2003.

The thirteen power plants generate about 700 GWh, in a year of normal precipitation, and their gross sales value totals around NOK 1.3 billion. Their sale will yield a pre-tax profit of close to NOK 1 billion, and of around NOK 500 million after tax. The pre-tax profit will be included in the profit and loss account under "Other items".

Sale of forest properties

Norske Skog entered in the autumn of 2001 into agreements for sale of its forest properties in South-East Norway. The agreed value was close to NOK 200 million, and an estimated capital gain of NOK 155 – 160 million.

The transaction has not been booked in Norske Skog's accounts, as it was subject to permission from the authorities. We are today notified that these authorities have decided not to give permission to the buyers of the forest properties.
